

**May 29, 2012**

**7:00 PM - 9:00 PM**

**Ward 6 - Public Open House re: WW Ashely Park Accessible Playground and Skate Park -- JS Wood Library Auditorium, 1801 Landsdowne Avenue**

W.W. Ashley Park is scheduled for the development of a new destination accessible playground and a new satellite skate park. W.W. Ashley Park will be one of four destination accessible playgrounds in Saskatoon that have incorporated specific design elements which make them accessible to both children and caregivers with disabilities. This playground includes design elements such as a pour in place rubberized surface as well as ground level and elevated accessible play components. By providing destination accessible playgrounds, the City can better ensure that children, whether disabled or not, can play together close to home and with their friends. The City of Saskatoon invites you to a come-and-go evening to view the park layout and proposed drawings for these new park amenities.
